Travel Insurance  
**individually**  
**designed** to meet  
your needs

We use our **extensive experience, innovative underwriting, technology** and **ground-breaking services** to design policies that provide a comprehensive solution for travel medical needs.

Because a group plan for humanitarian activities in Nairobi doesn't have the same needs as business project in Bangladesh or a student expedition to Greenland, we gather information about group destinations, demographics, activities and specific needs.

**At battleface we customise and develop plans specifically for groups of people who travel, live and work internationally.**

## Policy tailoring

Once we've targeted bare essentials with one of our standard travel benefits plans, the tailoring process begins.

Core Benefits:

**MEDICAL EXPENSES  
MEDICAL EVACUATION  
PERSONAL ACCIDENT  
REPATRIATION OF MORTAL REMAINS**

We match add-ons based on a group-specific profile.

Tailored add-ons:

- **Trip cancellation & curtailment**
- **Baggage & personal effects**
- **Personal liability**
- **Equipment**
- **Crisis response**

*(Kidnap & Ransom, Political evacuation, Security evacuation, Natural disaster evacuation)*

## Nonprofit

We work with NGOs, humanitarian aid groups, mission groups, charities and many other foundations operating globally, including those located in hostile or challenging locations.

## Corporate

With our international group travel insurance plans, organisations can have peace of mind knowing that their employees have the protection they need to succeed abroad.

## Education

Our travel plans for multi-national schools and universities are tailored for their employee and student populations. We ensure that on-the-ground emergency support is built into every solution with 24/7 access and support.
